

Section 18 – E-mail services

Answers

1. A
2. A,b and c
3. D
4. B
5. B
They are stored each message in its own file. In mbox format, messages get stored in one long text file where they are separated by From lines
6. A
7. B
You'd use the message headers for this purpose
8. B
`inet_interfaces=all`
9. A
10. A
But newaliases command must be run after any changes are made to the file
